

Rasterize *it*

Harlequin RIP

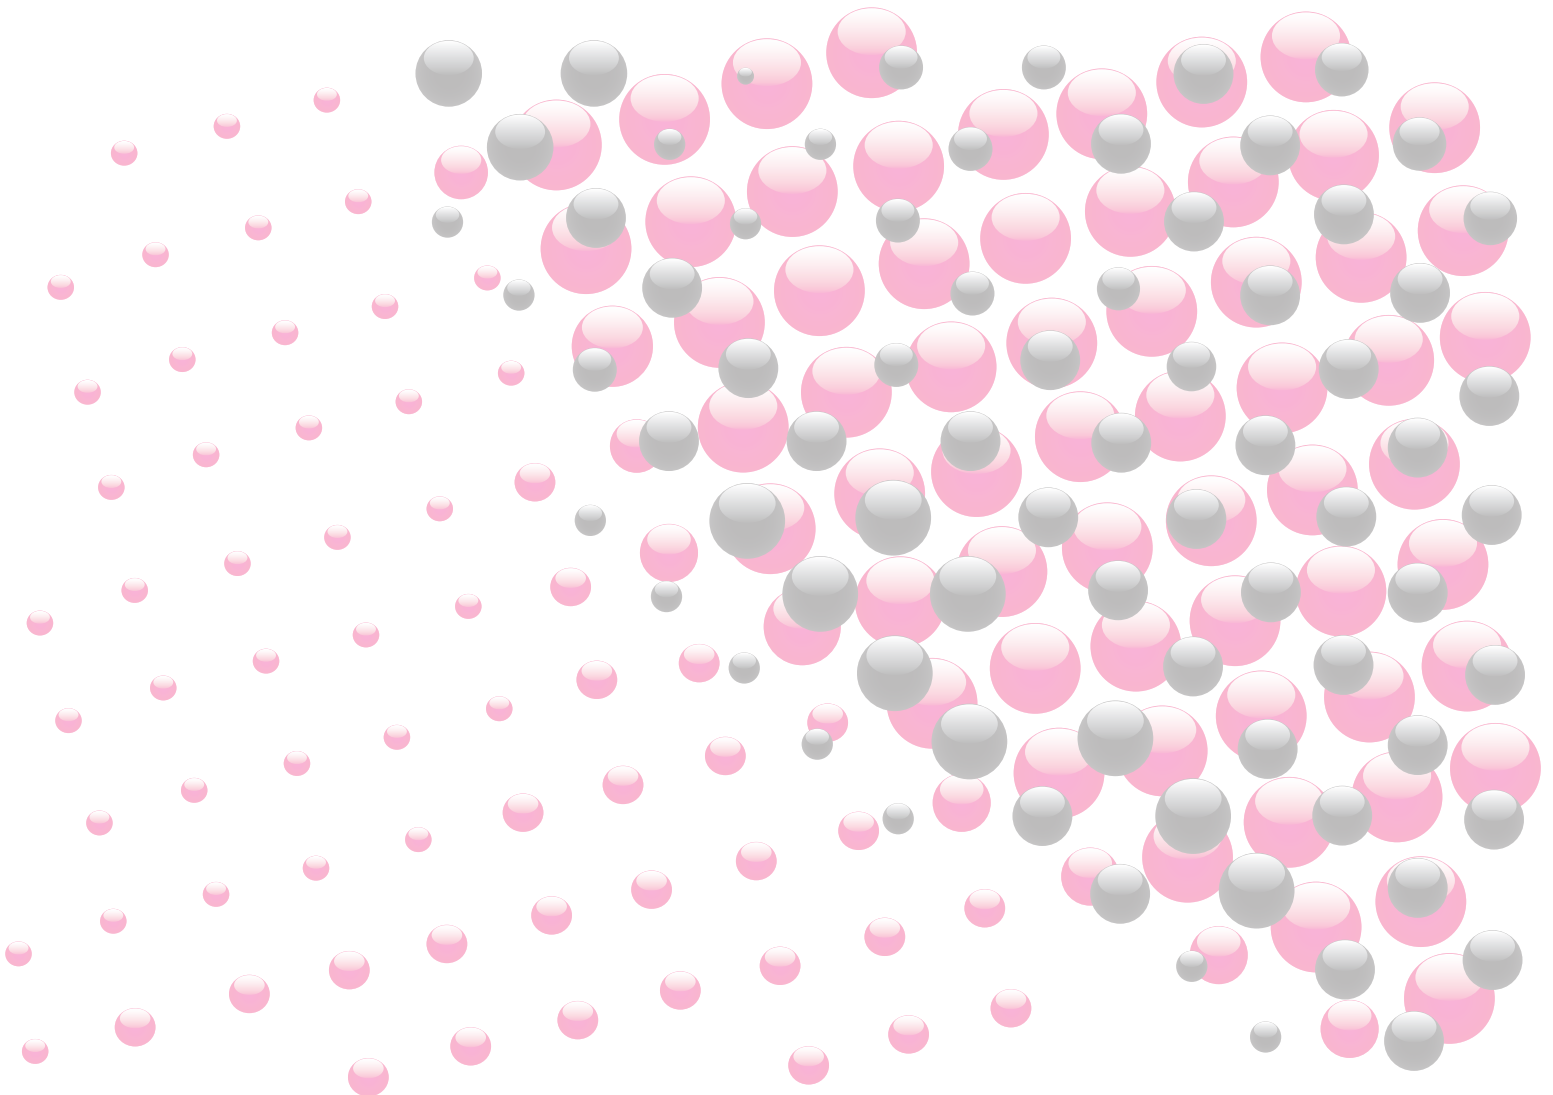

High Performance Harlequin RIP

Native PDF, PS & XPS Processing

AM, FM and XM Screening

Ideal for Hybrid Workflows

JDF Enabled

Rasterize-it

HIGH PERFORMANCE - HIGH QUALITY

Each new revision of Rasterize-it introduces significant performance increases and enhancements, all designed to provide you with the processing power and the range of features that you need to run your print operation efficiently.

So keep your print operation up to speed with Rasterize-it. It won't let you down.

NATIVE PDF, PS & XPS PROCESSING

Processing file formats natively means there is no intermediary conversion to another file format. Files are rendered more quickly and accurately.

In Addition to native PostScript and PDF (up to PDF 1.7) processing, Rasterize-it also supports native XPS processing. XPS, the XML Paper Specification, is the very newest print format developed by Microsoft and available with Windows Vista™. If you already process Microsoft files, provide in-plant printing services, or your client base is mostly large corporates then XPS processing is a must for you.

IDEAL FOR HYBRID WORKFLOWS

Do you print newspaper and commercial work? How about commercial and short run digital? Make sure that you use Rasterize-it, the proven RIP engine with an extensive track record in analogue, digital, newspaper and commercial prepress - it's the ideal RIP to use in your hybrid workflow.

JDF-ENABLER OPTION

Rasterize-it is able to process jobs passed from a JDF source. JDF is an electronic replacement for a job bag and can bring cost savings to all sizes of operation. Rasterize-it's engine, the Harlequin RIP was the first product to be JDF certified by CIP4 following testing by the Printing Industries of America/Graphic Arts Technical Foundation. Rasterize-it supports up to the JDF 1.3 specification.

Consider these options for even more functionality...

- TrapPro *Object Based inRIP Trapping*
- HDS *Second Order Stochastic Screening (FM)*
- HXM *Cross Modulated (Hybrid) Screening*
- INK-it *Ink Saving and Optimization*
- PDF-it *Datalocked RASTER PDF*
- View-it *eProof*
- Send-it *Job Submission*
- PrePage-it *The Ultimate PreFlight Server*
