

Job Submission

So Much Easier than FTP

Open for Business 24/7

Email Notification

Optional Collaborative Annotation

Optional ICC Color Management

Simple as 1. 2.. 3...

So Much Easier than FTP

Your clients simply login and start sending files. You choose and set the parameters for how files will be processed up front. Clients can only see their own jobs and all of this takes place in your own branded web portal.

Open for Business 24/7

Send-it is the CSR that never sleeps, takes a vacation or even a coffee break! Your clients have instant access to submit work to you any time of the day or night, and with a web portal you can just as easily accept work from across the country as if it was across the street.

Email Notification

Get notified when a client uploads a file. Send-it can also send you an email message if a file has an error as well as let you know when files have been either approved or rejected by the customer.

Consider these options for even more functionality

View-it *eProofing*

Collaborate with Staff and Customers

Add on View-it to fully interact with customers in a real-time collaborative environment. Use mark up tools to annotate the file as well as a host of other tools that allow you or your customer to inspect color separations, overprint, traps, rule out 4 color black text and a variety of other functions.

ICC Color Managed

Looking for color managed eProofing? Look no further, Send-it and View-it combined with a calibrated monitor offer ICC color managed eProofs as well as a fully collaborative environment to view them in.

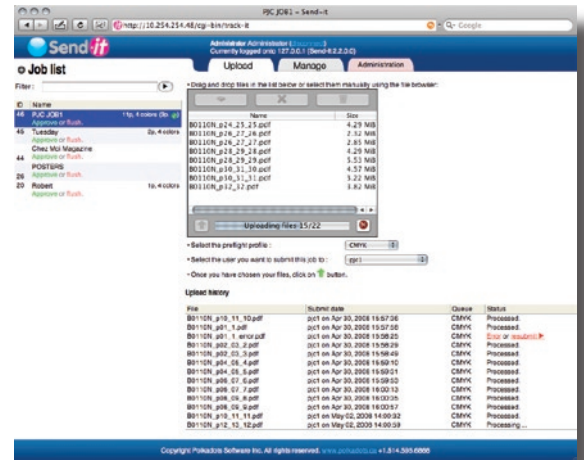

PrePage-it *The Ultimate PreFlight and ROOM Server*

- AutoFix PDF Transparency
- AutoFix Missing Fonts
- AutoFix RGB Images

1. Clients can easily login and upload their jobs to be processed according to predetermined parameters.

2. Manage the files after being uploaded.

3. Add on View-it to eProof the final pages and verify that contents are correct. View color separations, ink densities, overprint, trapping. Annotate the pages in a fully collaborative environment. Approve or Reject the files in a Color Managed workspace.
